

JIANG JIAXIAN

About Me

As a Higher Diploma student majoring in Software Engineering, I specialize in full-stack development. I possess strong proficiency in front-end technologies (HTML/CSS/JavaScript) and am currently self-learning modern frameworks such as Vue.js and React. Additionally, I have solid back-end development skills (Java/Python, MySQL, Linux). I am currently preparing for the CCNA certification and am committed to integrating networking and security principles into system design to build robust.
